MilCOTS™

Isolated Converters

“Off-the-shelf” DC-DC Converters for Cost Sensitive Military/Avionics Applications

The MilQor® series of Mil-COTS Isolated DC-DC converters brings SynQor’s field proven high-efficiency synchronous rectifier technology to the Military/Avionics industry. These “off-the-shelf” converters are compatible with the industry standard format, operate at a fixed frequency, and follow conservative component derating guidelines. MilQor® products are designed and manufactured to comply with a wide range of military standards.

MCOTS Product Features

- ◆ High efficiency, up to 95% at full rated load current
- ◆ Fixed frequency switching provides predictable EMI
- ◆ No minimum load requirement
- ◆ Rugged design for harsh environments
- ◆ Full Feature option on some models
- ◆ Flanged baseplate available
- ◆ Industry standard pin-out configurations and standard footprints.
- ◆ Available: High-capacitance option for very large output capacitance and extreme transient applications
- ◆ -55 °C to +100 °C Operating Temperature

Protection

- ◆ Input under-voltage lockout
- ◆ Output current limit and short circuit protection
- ◆ Active back bias limit
- ◆ Output over-voltage protection
- ◆ Thermal shutdown (not on DM Package Size)

Compliance Features

MilCOTS converters with MilCOTS filters are designed to meet:

- ◆ MIL-HDBK-704
- ◆ RTCA/DO-160 Section 16, 17, 18
- ◆ MIL-STD-1275
- ◆ MIL-STD-461
- ◆ DEF-STAN 61-5 (part 6)/(5, 6)

Control

- ◆ On/Off control referenced to input side (ON/OFF control isolated in Full Bricks)
- ◆ Remote sense for the output voltage
- ◆ Digital Output Current Sharing (HZ & HY only)
- ◆ Output voltage trim range of:
 - +10% to -20% (Half-Brick Zeta/Yota)
 - +10% to -50% (Quarter-Brick Exa)
 - +10% to -50% (Sixteenth Brick)
 - +10% to -10%

MilCOTS™

FILTERS

Mil-COTS DC Filter Modules

SynQor provides EMI filters for the MIL-COTS DC-DC converters. All EMI filters provide high levels of differential-mode and common-mode attenuation and include stabilizing bulk capacitors and damping resistors.

MCOTS DC Filter Features

- ◆ Low DC resistance
- ◆ Differential-mode attenuation
- ◆ Common-mode attenuation
- ◆ Bulk capacitance provides input system stabilization for downstream power converters
- ◆ -55 °C to +100 °C Operating Temperature
- ◆ No electrolytic capacitors (all ceramic design)
- ◆ High-voltage isolation between common-mode pins and input / output
- ◆ Wide temperature range operation
- ◆ Designed to meet MIL-STD-461

DC Filter Model Number	Input Voltage		Output Current	Isolation Voltage (to common-mode)	Maximum DC Resistance @ 100 °C	Differential-Mode Attenuation	Common-Mode Attenuation
	Continuous	Surge (<100ms)

MilCOTS™

High Voltage Non-Isolated

Mil-COTS High Voltage, Non-Isolated DC-DC Converters

The high input voltage non-isolated DC-DC converters offer unique solutions for converting high-powered, variable voltages to a wide range of output voltages. The converter is a non-isolated buck-boost regulator, which employs synchronous rectification to achieve extremely high conversion efficiency. These products are suitable for use in Intermediate Bus Architectures, or to provide a regulated output voltage from a variable voltage source such as a battery. They can be configured to ‘buck’ the input voltage down or ‘boost’ the input voltage up with a single external setpoint resistor.

Battery Charging Features

KEY FEATURE OF TRIMMABLE CURRENT LIMIT

- ◆ Provides the power conversion platform for battery charging
- ◆ Output current limit is externally controlled for constant-current charging
- ◆ Current can be set with an external resistor or an active circuit
- ◆ Current analog signal provided for instrumentation and control functions
- ◆ Ideal diode output stage with zero back-drive currents prevents discharge of battery when not charging
- ◆ Output voltage set-point is independently controlled through trim pin
- ◆ Unit will smoothly transition between current and voltage modes as charging cycle needs change

Operational Features

- ◆ Ultra-high efficiency up to 97%
- ◆ Wide input voltage ranges: 9-60 V (28 V); 9-90 V (28 VE)
- ◆ Buck/Boost Mode available
- ◆ Maximum input/output currents up to 40 A
- ◆ Suitable for use in Intermediate Bus Architectures
- ◆ On-board input and output filtering
- ◆ No minimum load requirement
- ◆ -55 °C to +100 °C Operating Temperature
- ◆ Remote sense and wide output voltage trim (Half-brick only)

Protection

- ◆ Input under-voltage lockout (UVLO)
- ◆ Output current limit (OCP) and short circuit protection
- ◆ Output over-voltage protection (OVP)
- ◆ Thermal shutdown (OTP)
- ◆ Output voltage trim

Mil-COTS Non-Isolated DC-DC Converters

MilCOTS™

Bus Converters

Mil-COTS Rugged, High Efficiency Next Generation DC-DC Bus Converters

These Military bus converters are the next-generation, board-mountable, isolated, fixed switching frequency DC-DC converters that use synchronous rectification to achieve extremely high conversion efficiency. MCOTS Bus converters are ideal for creating the mid-bus voltage required to drive point-of-load (non-isolated) converters in Intermediate Bus Architectures.

Operational Features

- ◆ High efficiency, up to 97% at full rated load current
- ◆ Delivers up to 65 A @ full power with minimal derating
- ◆ Operating input voltage range: 230-400 V, 440-700 V, 700-900 V, and 800-1000 V
- ◆ Fixed frequency switching provides predictable EMI
- ◆ No minimum load requirement
- ◆ Industry standard half-brick pin-out configuration
- ◆ -55 °C to +100 °C Operating Temperature

Protection

- ◆ Input under-voltage and over voltage lockout protects against abnormal input voltages
- ◆ Output current limit and short circuit protection (auto recovery)
- ◆ Thermal shutdown
- ◆ On/Off control referenced to input side
- ◆ Inherent current share (by droop method) for high current and parallel applications
- ◆ Clock synchronization (primary reference)

Advancing the Power Curve®

Located in Boxborough, MA USA, SynQor is a leading supplier of power conversion solutions to the military, avionics, transportation, medical, industrial, telecommunications and computing markets. SynQor's innovative products are designed to exceed the demanding performance, quality, and reliability requirements of today's power electronic engineers who develop leading-edge infrastructure hardware. SynQor provides all the power conversion modules needed to build a power system, and it also provides complete power systems. SynQor's capabilities include both standard and custom solutions, and it delivers them with industry leading service and support. SynQor's total commitment to quality, customer satisfaction and continuous improvement drives our business processes.
