# 3-Phase to Single-Phase AC Conversion

## with *Balanced 3-Phase Currents*

### 3-PHASE CURRENT BALANCING PROBLEM

Single-Phase loads represent a complex problem for 3-Phase utilities found in aircraft and ships in that phase currents must be closely balanced. In fact, MIL-STD-1399-300B requires all phase currents to be balanced to within  $\pm 5\%$  for ships and  $\pm 3\%$  for submarines. It is impossible to achieve this degree of phase-to-phase current balance in a 3-Phase system that has significant Single-Phase electronic loads. The industrial, shipping and military sectors have therefore used UPS, electronic voltage regulators, variable shunt reactors and sophisticated transformer arrangements to try to balance 3-Phase loads. These solutions are heavy, bulky and usually do not solve the phase current balance problem.

### SYNQOR'S SOLUTION

SynQor has developed an electronic solution to solve the 3-Phase current balance problem. The conceptual approach is to isolate the input 3-Phase power source from the output Single-Phase loads through a DC Mid-Bus. An AC to DC converter converts 3-Phase power into DC at the Mid-Bus. An inverter then converts the DC power into Single-Phase. This approach allows unbalanced noisy Single-Phase loads to appear to the input 3-Phase source as, clean, well behaved, high power factor, balanced and MIL-STD-1399-300B compliant 3-Phase loads. SynQor has compact, lightweight, efficient and military rugged current balancing solutions for 440 V, 230 V and 115 V 3-Phase systems.

#### 440 V<sub>AC</sub>

For the 440 voltage input solution, SynQor has developed the Military-Grade 3-Phase AC Changer (MAC).

#### 115 OR 230 V<sub>AC</sub>

For 115 and 230 input voltages, the SynQor solution uses its field proven 115 V or 230 V universal frequency input Military Power Supply (MPS) followed by its 115 or 230 output voltage Military Inverter (MINV).

### BENEFITS OF SYNQOR'S APPROACH:

- ◆ Balanced load currents for 3-Phase sources; MIL-STD-1399-300B compliant.
- ◆ Components are compact, ultra-low weight, efficient and rugged to military standards.
- ◆ Galvanic Isolation between the input source and the output load.
- ◆ High noise and transient isolation between the input source and the output load.
- ◆ Floating or non-floating ground outputs options: 115 or 230 volts at 50, 60 or 400 Hz.
- ◆ Parallel/redundant configurations of up to 32 systems than can condition loads of up to 110 kW.
- ◆ Complex 3-Phase and Split-Phase parallel or redundant output configurations.
- ◆ Full power operation: -40°C to +55°C
- ◆ All devices can be remotely monitored via SNMP.

# MINV

**Military Power Supply**

**Military Power Inverter**

**Up to 32 units can be combined for higher power or redundancy**

## MILITARY-GRADE 115 V, 230 V 3-PHASE CURRENT BALANCING SOLUTION

The MPS is a nearly perfectly 3-Phase balanced load that converts 3-Phase AC to DC in the Mid-Bus. The MINV transforms DC power in the Mid-Bus to a well-conditioned AC Single-Phase output. This system architecture can be paralleled to permit fault-tolerant parallel operation for higher power and/or N+M redundant systems.

### MPS + MINV PRODUCT FEATURES

- ◆ Sealed, weather-proof, shock-proof construction
- ◆ Two-stage, DC link isolated topology
- ◆ 4000 W (5000 VA) output power
- ◆ Phase input: 80-265 Vrms line-to-line; 47-800 Hz
- ◆ 28 V DC Input & 270 V DC Input
- ◆ Input Current Balance  $< \pm 3\%$
- ◆ Handles 0.0—1.0 power factor loads and non-linear loads
- ◆ Full power operation:  $-40^{\circ}\text{C}$  to  $+55^{\circ}\text{C}$
- ◆ Up to 32 units can be combined for higher power, voltage or a 3-Phase AC output
- ◆ Up to 32 units can be combined to form a higher power fault-tolerant, glitch-free system, N+M redundant systems
- ◆ Battle Mode for over-temperature events
- ◆ User I/O and Configuration signal port
- ◆ SNMP Monitoring
- ◆ MPS 1U high rack mount unit (17.00"W x 20.42"D x 1.73"H)
- ◆ MINV 1U high rack mount unit (17.00"W x 22.43"D x 1.73"H)
- ◆ Low weight: MPS - 28 lbs., MINV - 32 lbs.

### SPECIFICATION COMPLIANCE

**MPS & MINV system integration is designed to meet:**

- ◆ MIL-STD-1399-300B - Interface Shipboard
- ◆ MIL-STD-810G - Environmental Engineering
- ◆ MIL-STD-461F - Electromagnetic Interference
- ◆ MIL-STD-704F - Aircraft Electrical Power
- ◆ MIL-STD-1275D - Vehicle Electrical Power

### OUTPUT OPTIONS

- ◆ Pure sinusoidal 115 Vrms or 230 Vrms AC output
- ◆ 50 Hz, 60 Hz, or 400 Hz AC output
- ◆ Shipboard version with floating neutral wire
- ◆ N+1 redundancy

# MPS

## 3-PHASE MILITARY-GRADE AC-DC POWER SUPPLY (MPS)

Family	Output Power	Height	AC Input Phase #	AC Input Frequency	DC Output Voltage @ Full Load*	Output Regulation	Network
MPS	4000: 4000 W	1U: 1.73"	3: 3-Phase	W: 47-800 Hz	2D: 28 V 2E: 30 V 4B: 48 V	S00: Semi-regulated	E00: Ethernet/SNMP

**Part Numbering Example:** MPS-4000-1U-3W2ES00-E00 For valid part numbers, refer to the website or contact your local sales representative.

\*Approximate output voltage at full load, output voltage has Droop

## 3-PHASE MILITARY-GRADE AC-DC PROGRAMMABLE POWER SUPPLY (MPPS)

Family	Output Power	Height	AC Input Phase #	AC Input Frequency	DC Output Voltage @ Full Load*	Output Current Range	Network
MPPS	4000: 4000 W	1U: 1.73"	3: 3-Phase	W: 47-800 Hz	28: 0-35 V 48: 0-55 V 72: 0-80 V	150: 0-150 A 120: 0-120 A 078: 0 - 78 A	E00: Ethernet/SNMP

**Part Numbering Example:** MPPS-4000-1U-3W28-150-E00 For valid part numbers, refer to the website or contact your local sales representative.

## MILITARY-GRADE POWER INVERTER (MINV)

Family	Output Power	Height	DC Input Voltage	AC Output Voltage	AC Output Neutral Wire	AC Output Set Point Frequency	Output Configuration	Additional Options
MINV	4000: 4000 W 5000 VA	1U: 1.73"	28: 28 V <sub>NOM</sub> 270: 270 V <sub>NOM</sub>	1: 115 V <sub>rms</sub> 2: 230 V <sub>rms</sub>	G: Grounded F: Floating* R: AC Output Electronic Breaker*	5: 50 Hz 6: 60 Hz 4: 400 Hz	S: Single-Phase Output	E00: Ethernet / SNMP ECE: Ethernet / SNMP & CE Marking

**\*Note:** Order "F: Floating" option when configuring the AC output for multi-unit combinations of up to 32 units.

Order "R: AC Output Electronic Breaker" option for fault-tolerant, glitch-free parallel systems of up to 32 units with N+M redundancy.

The AC output neutral wire will not be connected to the chassis for either the F option or R option.

**Part Numbering Example:** MINV-4000-1U-28-1G6S-E00 For valid part numbers, refer to the website or contact your local sales representative.

# MAC

**Military AC Changer**

**Up to 32 units can be combined for higher power or redundancy**

## MILITARY-GRADE 440 V 3-PHASE AC CHANGER (MAC)

This MAC will accept a 3-Phase 440 V<sub>AC</sub> input and change it to a well-conditioned Single-Phase 115/230 V<sub>AC</sub> output using a two-stage DC link isolated topology. Options include a selection of output voltage amplitudes, frequencies and an electronic breaker on the AC output to permit fault-tolerant parallel operation for higher power and/or N+M redundant systems

### MAC PRODUCT FEATURES

- ◆ Sealed, weather-proof, shock-proof construction
- ◆ Two-stage, DC link isolated topology
- ◆ 4000 W (5000 VA) output power, 15 s transient to 5250 W (6500 VA)
- ◆ Full power operation: -40 °C to +55 °C
- ◆ 3-Phase 360-528 V<sub>rms</sub><sub>L-L</sub> Δ input (draws balanced current)
- ◆ 47-65 Hz input range
- ◆ Pure sinusoidal AC output voltage
- ◆ Handles 0.0—1.0 power factor loads and non-linear loads
- ◆ Up to 32 units can be combined for higher power, voltage or a 3-Phase AC output
- ◆ Up to 32 units can be combined to form a higher power fault-tolerant, glitch-free system, perhaps with N+M redundancy, by ordering with the “AC Output Electronic Breaker” option and the appropriate configuration cable
- ◆ User I/O and Configuration signal ports
- ◆ Battle Mode for over-temperature events
- ◆ 1U high rack mount unit (17.00”W x 22.42”D x 1.73”H)
- ◆ Low weight: 33 lbs.

### SPECIFICATION COMPLIANCE

**MAC-4000 units are designed to meet MIL-STD:**

- ◆ MIL-STD-1399-300B - Interface Shipboard
- ◆ MIL-STD-810G - Environmental Engineering
- ◆ MIL-STD-461F - Electromagnetic Interference

### OPTIONS

- ◆ 115 V<sub>rms</sub> or 230 V<sub>rms</sub> AC output
- ◆ 50 Hz, 60 Hz, or 400 Hz AC output
- ◆ Shipboard version with floating output neutral wire
- ◆ N+1 Redundancy

### MAC-4000-1U
