

Passive EMI Filter

-200 to +200V

10A Output Current 70mΩ @ 100°C Max DC Resistance >80dB @ 250kHz Differential Attenuation

Full Power Operation: -40°C to +100°C

RQ200PFQTC10SRS-G Module

The RailQor series of EMI filters brings SynQor's field proven technology and manufacturing expertise to the industrial power applications marketplace. SynQor's innovative packaging approach ensures survivability in the most hostile environments. Compatible with the industry standard format, these filters have high differential-mode and common-mode attenuation, low DC resistance, and a stabilizing bulk capacitor resistor. They follow conservative component derating guidelines and they are designed and manufactured to the highest standards.

Operational Features

- ▶ 10A output current
- ► Very low DC resistance
- >>80dB @ 250kHz differential-mode attenuation
- >>50dB @ 250kHz common-mode attenuation
- ▶ Stabilizing bulk capacitor and damping resistor included
- ► All capacitors are X7R multi-layer ceramic
- ► Meets requirements of standard EN 50155

Mechanical Features

- ► Industry standard quarter-brick pin-out configuration
- ► Size: 1.536" x 2.386" (39.01 x 60.6mm)
- ► Height: 0.500" (12.7mm)
- ► Weight: 3.53oz (100g)

In-Line Manufacturing Process

- ► AS9100 and ISO 9001 certified facility
- ► Full component traceability

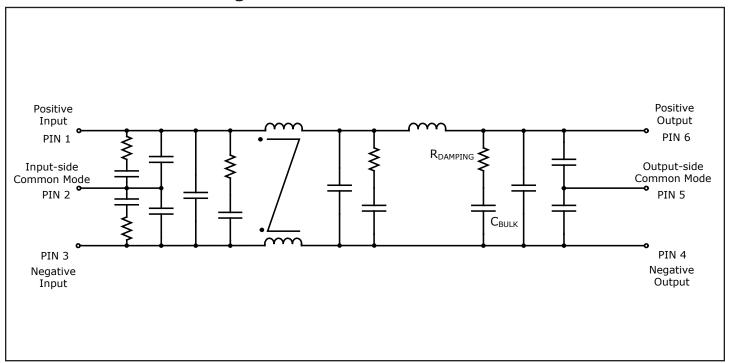

Safety Features

- ▶ Baseplate isolation 2000Vrms, 60s per EN 50155
- ► UL 60950-1
- ► CAN/CSA C22.2 No. 60950-1
- ► EN 60950-1
- ► EN45545-2 R24/R25 Compliant
- ► CE Marked

BASIC OPERATION AND FEATURES

This module is a multi-stage differential-mode and common-mode passive EMI filter designed to interface a power source with one or more SynQor dc-dc converters (or other loads that create EMI). Each stage of this filter is well damped to avoid resonances and oscillations, and only X7R multi-layer ceramic capacitors are used.

This InQor EMI filter includes a large bulk capacitor with a series damping resistor to correct for the unstabilizing effect of a converter's negative input resistance. A white paper discussing this negative input resistance and the need for corrective damping can be found on the SynQor website (see Input System Instability application note).

A typical application would place the InQor filter close to the input of the dc-dc converter. The input-side common-mode pin would be connected to the chassis ground that is common with the system input line filter or other earthed point used for EMI measurement. The output-side common-mode pin would be connected to the output ground or plane of the power convectors with as low inductance a path as possible. There are no connections to the metal baseplate, which may also be connected to the chassis ground if desired.

Do not connect the outputs of multiple InQor filters in parallel. Connecting filters in this manner may result in slightly unequal currents to flow in the positive and return paths of each filter. These unequal currents may cause the internal common-mode chokes to saturate and thus cause degraded common-mode rejection performance.

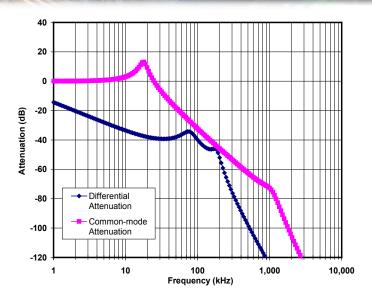

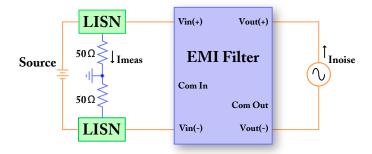

Figure 1: Simulation of calculated common-mode and differential-mode current attenuation. The plots show the ratio of the measured current in a 50Ω LISN sensing port connected to pins 1 or 3 to the noise current injected into pins 4 and 6. See Figs. 2 & 3.

NOTES

- Applied torque per M3 screw should not exceed 6in-lb (0.7Nm).
 Screw should not exceed 0.100" (2.54mm) depth below the surface of the baseplate.
- 2) Baseplate flatness tolerance is 0.004" (.10 mm) TIR for surface.
- 3) Pins 1-3 & 5 are 0.040" (1.02mm) diameter, with 0.080" (2.03mm) diameter standoff shoulders.
- 4) Pins 4 & 6 are 0.062" (1.57 mm) diameter with 0.100" (2.54mm) diameter standoff shoulders.
- 5) All Pins: Material Copper Alloy

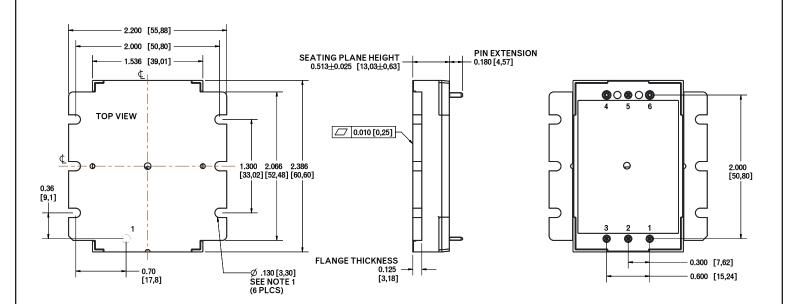

Finish: Matte Tin over Nickel plate

- 6) Undimensioned components are shown for visual reference only

Application Notes

A variety of application notes and technical white papers can be downloaded in pdf format from our website.

RoHS Compliance: The EU led RoHS (Restriction of Hazardous Substances) Directive bans the use of Lead, Cadmium, Hexavalent Chromium, Mercury, Polybrominated Biphenyls (PBB), and Polybrominated Diphenyl Ether (PBDE) in Electrical and Electronic Equipment. This SynQor product is 6/6 RoHS compliant. For more information please refer to SynQor's RoHS addendum available at our RoHS Compliance / Lead Free Initiative web page or e-mail us at rohs@synqor.com.

ORDERING INFORMATION

The tables below show the valid model numbers and ordering options the filters in this product family. When ordering SynQor filters, please ensure that you use the complete 15 character part number consisting of the 12 character base part number and the additional 3 characters for options. A "-G" suffix indicates the product is 6/6 RoHS compliant.

Model Number	Continuous Input Voltage	Max Output Current
RQ200PFQTx10SRS-G	-200 to +200V	10A

The following options must be included in place of the w x y z spaces in the model numbers listed above.

Thermal Design	Enable Logic	Pin Style	Feature Set
C - Encased V - Encased with Flange	S - Standard	R - 0.180"	S - Standard

Not all combinations make valid part numbers, please contact SynQor for availability. See the <u>Product Summary web page</u> for more options.
